

INX Locations and Information

We currently operate four Internet Exchange Points, one in each of the 4 largest economic centres in South Africa

Within each city, each INXes is multisite; ie. **you can connect to all peers from any of the locations**, at no extra cost, or complexity. That leaves you, to choose a data-centre that best suits your business needs, whilst still getting the benefit of being able to peer with operators from all the other participating locations. So, within a city, you just need to find the data-centre that works best for you!

The INXes do **NOT** connect to each other (ie. CINX does not connect to JINX nor DINX, etc).

JINX

Johannesburg (JINX)	
JINX Parklands (PKL) 7-9 Keyes Avenue, Rosebank, Johannesburg	JINX Samrand (SMR) 21 Landmarks Avenue, Samrand, Johannesburg
